OBJECTIVE

Computer Science student at BRAC University with a strong interest in Natural Language Processing (NLP), Machine Learning, and Software Development. Skilled in MERN stack development and experienced in building academic and personal projects. Passionate about problem-solving, clean coding practices, and continuous learning. Seeking opportunities to apply technical knowledge, gain industry experience, and contribute to innovative projects.

EDUCATION

BRAC University Dhaka, Bangladesh
Bachelor of Science in Computer Science and Engineering (CSE)
Undergraduate Student **Mohammadpur Preparatory School and College** Dhaka, Bangladesh

Higher Secondary Certificate (HSC)
GPA: 5.00/5.00 **Mohammadpur Preparatory School and College** Dhaka, Bangladesh

Secondary School Certificate (SSC)
GPA: 5.00/5.00

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript
Web Development: HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, MERN Stack, RESTful APIs
Databases: SQL, MySQL, MongoDB
Machine Learning & Data Science: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, OpenCV
AI & Deep Learning: PyTorch
Tools & Technologies: Git/GitHub.
Desgin: Figma

PROJECTS

Mass Transit Control System React.js, JavaScript, MongoDB, HTML, CSS
Academic Group Project

- Developed a full-stack web application for mass transit management, contributing to both frontend and backend development.
- Implemented lost-item management functionality and Bangla-English language switching.
- Collaborated with team members to integrate features and build an interactive user interface.
- **GitHub:** View Project

Obesity Level Prediction Using Machine Learning Python, Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib
Academic Group Project

- Analyzed and preprocessed a dataset of 2,111 records to predict seven obesity categories based on demographic, dietary, and lifestyle factors.
- Performed exploratory data analysis, handled missing values and outliers, encoded categorical features, and applied feature selection and standardization.
- Trained and compared Decision Tree, Random Forest, Logistic Regression, and Neural Network classifiers, using SMOTE to address class imbalance.

- Achieved 90.21% accuracy with the Random Forest classifier on the reported scaled test-set evaluation and visualized model performance using confusion matrices, ROC curves, and comparative metric plots.
- **GitHub:** View Project

RESEARCH EXPERIENCE

The Hidden Gamble: The Influence of Online Gaming on Gambling Tendencies Among Youth
Human-Computer Interaction (HCI), Mixed-Methods Research
Undergraduate Research Project — BRAC University

- Investigated gambling-like tendencies associated with chance-based reward mechanics in online games among Bangladeshi youth.
- Conducted 30 semi-structured interviews and analyzed survey responses from 150 participants using thematic and statistical analysis.
- Designed two responsible-gaming prototypes featuring spending-management controls and a reward-progress indicator.
- Evaluated the prototypes through usability testing with 10 participants to assess transparency, spending awareness, and decision-making support.

HONORS & AWARDS

Vice Chancellor's List, BRAC University [2023]
